

Classic Hardwood

- Millbrook Timbers engineered wood floors are made with classic finishing techniques.
Beautiful natural wood textures are enhanced with light wire brushing, refined edge bevels, and multiple rich stains.

Built to Last

- The thick 2 mm European oak or hickory face stands up to **years of wear**.
- The durable aluminum oxide finish **resists scratches** and stays beautiful.
- The seven-layer construction is **exceptionally stable**, even in changing temperature and humidity.

Large Luxurious Planks

Wide Planks
7½" width

Six Foot Planks
Long random lengths up to 75"

Premium Sort
Over 60% of floor area is 75" boards

Ideal ½" Thickness

- Beacon Hill's thick ½" construction creates beautiful, level transitions where hardwood meets tile flooring (when tile is adhered directly to the subfloor).

Corner Cuts

- To show the seven layers of sturdy engineered wood
